TESTIMONY

Our experience with Heartland Builders can be summed up in one word, "Quality".

We have done multiple jobs on multiple sites with Heartland Builders and the attitude is always the same, "Quality first".

Having done many large projects, (some as large as 17 acres under roof), it is nice to work with a contractor who puts good superintendents on site and promotes "lets work together and get it done" attitude.

Heartland projects are always kept clean, and as a sub-contractor, we have been able to get in and get our work done, due to the help and planning from the knowledgeable superintendents.

As far as business goes, contracts, change orders, and payments have always been taken care of in a timely manner.

Our experience with Heartland Builders has been a very good one. We are looking forward to working with them again in the future.

Respectfully,

William G. Welter

Owner/President of Concept Builders, LTD.
